## INTERNATIONAL SEARCH REPORT

International application No.  
PCT/SN2004/002015**Box No. II** Observations where certain claims were found unsearchable (Continuation of Item 2 of first sheet)

This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reason:

1. ☐ Claims Nos.:  
because they relate to subject matter not required to be searched by this Authority, namely:
2. ☐ Claims Nos.:  
because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:
3. ☐ Claims Nos.:  
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 64(a).

**Box No. III** Observations where unity of invention is lacking (Continuation of Item 3 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

See extra sheet

1. ☐ As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.
2. ☐ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:
4. ☒ No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.: 1 - 7

Remark on Protest

- ☐ The additional search fees were accompanied by the applicant's protest.
- ☐ No protest accompanied the payment of additional search fees.

The following separate inventions were identified:

I: Claims 1-7 directed to a display stand for displays, where the displays are jointly connected to a strip displaceable inside a pole in longitudinal direction.

II: Claims 8-14 directed to a display stand for displays, and a supporting means for supporting a pole when it is resting on the ground. The lower portion is provided with at least a wheel rotatable around an axle, wherein the display stand is pivotally around an axle from a first position supported by supporting means, to a second position, in which it is supported by the wheel.

A partial search has been carried out, which relates to the invention I mentioned above.

The applicant is invited to pay an additional fee for invention II.
